

Fareast Boats to prelaunch the FAREAST 37R and our NEW production technology at BOOT Düsseldorf

FAREAST 37R

Fareast press meeting at BOOT Düsseldorf

When: Monday 22nd of January @2pm

Where: Fareast Boats, stand 15/E40

How: Meet Mr.Maarten Voogd, Simonis & Voogd Yacht Design
and Mr. Weifeng Lu, founder Fareast Boats

Revolution or Evolution?

Fareast are always seeking breakthroughs in innovation, technology and performance.

We revolutionized the material and manufacturing process. We use the latest 3D CAD design, adapt aluminum mold instead of GRP material, and 5-axis CNC milled, which sets the tolerance to almost zero, and delivers a high quality finish product.

The NEW technology will be presented in our stand in Düsseldorf!

FAREAST 37R

"Light, Fast and Comfortable", that was a part of the design brief given to Simonis & Voogd Yacht design for the new FAREAST 37R.

"Innovative thinking and execution enables the crew of the FAREAST 37R to be very competitive in races but also enjoy nice fast cruising with the family. A clean and efficient deck lay-out with a modern rig setup guarantees easy handling. At 37 foot also the inside is spacious and has all the amenities one expects from this size boat. Overall weight is kept to an absolute minimum with a high ballast ratio in order to be the most spectacular boat in this size range.", says Maarten Voogd, from Simonis & Voogd Yacht Design.

"Young people nowadays are used to high speed sailing, and are using boats in a different way than 15-20 years ago. Fareast Boats has been at the forefront of high performance sport boats over the last six years, and are now introducing the FAREAST 37R." says Mats Runström, International Sales Manager at Fareast Boats. "All parts, including the hull mold, are vacuum infused from aluminum molds. This is a more expensive production method, but delivers the preciseness, finish, and quality, that an owner looks for in this range. The price starts from USD 140.000 ex VAT, which we think is the most competitive in its class!", says Mr. Runström.
